

## PHP Portal(s) & Android Mobile App

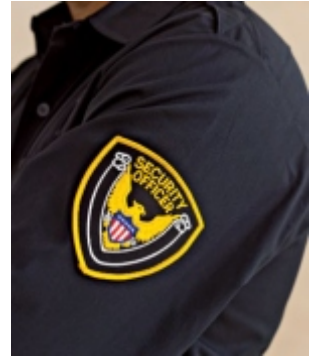

### Leading security services firm enhances efficiency through Microexcel developed 'Real Time Reporting System'

#### The Client

The Client is a leading full service provider of security & safety services

#### Business Need

The Client provides high tech security services to many residential and commercial complexes at multiple locations. To streamline its internal processes and to improve service performance and customer satisfaction, the Client needed a robust and effective security real time reporting system. In order to achieve their business goals, invited Microexcel a Microsoft Gold Certified Partner to come up with a solution that addresses all their strategic objectives.

#### The Challenge

- To develop a GPS location mapping in the admin portal where the admin can see the exact location of the guard – standing or patrolling.
- To build a QR code functionality that must be an inbuilt component of the mobile App.

**Technologies:** HTML, PHP, MySQL, JavaScript, Java, Android SDK

**Database:** MySQL

**Server:** Tomcat

#### Solution/Development

Microexcel after extensively studying the existing processes and mapping the requirements designed and developed a customized web portal (s) having separate modules for Admin and Clients and an Android App that supports multiple users with diverse roles.
